

We connect dots to unveil the hidden meaning behind things/data.

Some call it magic, we call it **brilliant data**.

WE'RE HIRING! HEAD OF TECHNOLOGY

Firefly seeks a head of technology who supports the business case development from a technological angle, drafts the architecture, selects the software components to be used (open-source and self-developed) and orchestrates the developer teams. He/she should have excellent knowledge of

graph and Big Data technologies, enterprise integration and cloud/web technologies in a Python environment. This is an opportunity to shape a new solution. His/her primary role will be to act as a player-coach, coding in addition to management responsibilities.

What we offer...

- A highly entrepreneurial work environment
- Be an important building brick in building a great new product
- Manage a team of developers to build the solution
- Lead in the development/implementation of high quality, innovative and sustainable software over the full life cycle of the solution
- Solve interesting and challenging problems alongside a great team of developers
- Analyze business requirements, possibly at client site (travel is not a requirement)
- Stay ahead on latest technologies that could enhance Firefly's solution
- Document progress and test solution

What we expect...

- Higher education degree in Information Technology or equivalent.
- Competence in any of the following: NoSQL/graph DBs, Big Data, HTML5, RESTful Web Services, cloud computing, information extraction and integration, data mining, machine learning
- Bonus points awarded for knowledge in Open Data, Linked Data principles
- Demonstrated competence in Python with web UIs
- An excellent command of English is mandatory and German knowledge would be an advantage.
- Great mentoring and management skills and an ability to assess and grow your team's capacity appropriately.
- Excellent time management and project management skills.
- Demonstrated ability to manage a complex workload, prioritize tasks and use good judgment in providing services based on goals with minimum supervision.

Our open positions are located in Zürich/Switzerland or Prague/Czech Republic and are full-time positions.

We offer a great opportunity within a dynamical and strong growing startup. You will engineer and deliver best practice data management solutions and will be able to further develop your semantic data, cloud solution and implementation skills. At Firefly you will discover a truly international culture,

highly dedicated and motivated colleagues, a cooperative work environment and interesting training opportunities.

We are looking forward to your application via careers.fireflyim.com or careers@fireflyim.com.
